Climb A Waterfall

thethirstytourist.com

WHAT IS a waterfall:

A typically fast-moving cascade of water from a river or stream that flows by gravity over a steep cliff or incline.

HOW TO CLIMB a waterfall:

Do not attempt this unless it is safe! The best way to climb a waterfall is to join a tour and participate as a group. When ascending join hands and take your time. Put one foot in front of another until you reach the top.

Plan A Visit:

BE SURE TO BRING...
