

# BACKYARD ADVENTURES

## *Viewing Glaciers*

[thethirstytourist.com](http://thethirstytourist.com)

### HOW IS a GLACIER FORMED:

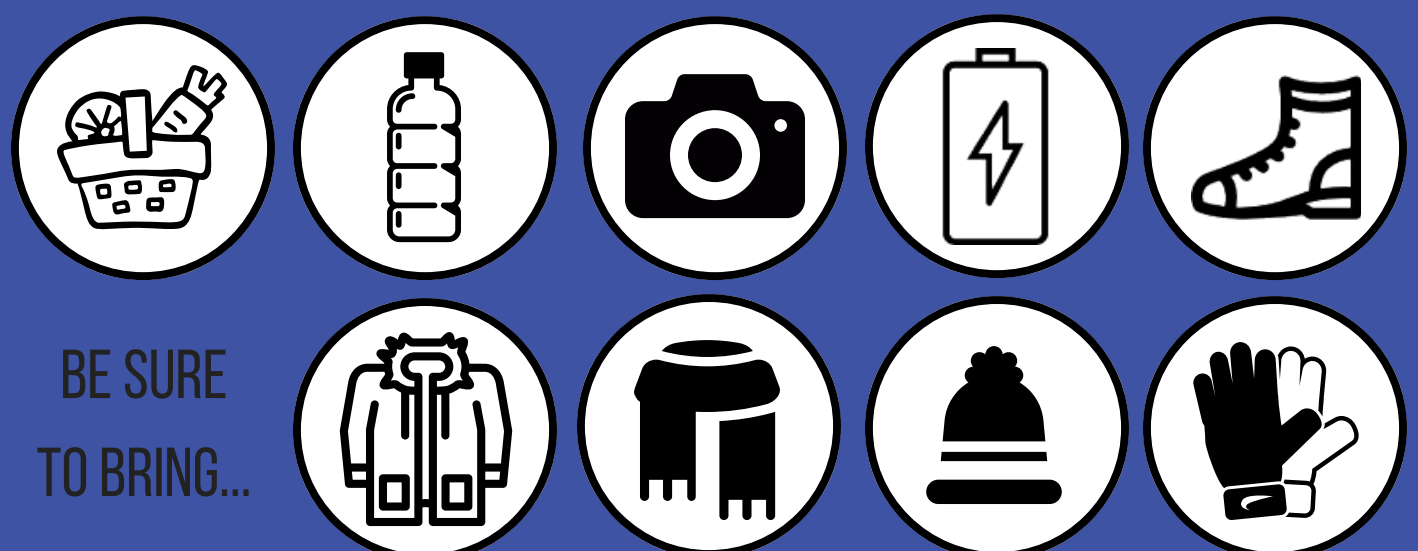

Most glaciers are found in cold climates. They are created by layers of compacted snow turning to ice over hundreds of years. The heavy weight of the many snow layers causes compression into ice crystals.

### FAMOUS GLACIERS:

Mendenhall Glacier, Margerie Glacier, Vatnajökull Glacier, Canada Glacier, Lambert Glacier, Blue Glacier

### *Plan A Visit:*

BE SURE  
TO BRING...
